

He's in for a **RUDE** Awakening!

He's spending good money for a good night's sleep.
Too bad he'll be getting up at a time someone else set.

That's why thoughtful hoteliers rely on Hotel Technologies.

Our clock radios have the **ONLY** genuine
Single-Day Alarm available to the hotel industry.
Once the alarm sounds, the setting reverts to OFF,
ready to be set by your next traveler.

No more complaints, no more rude awakenings.

And all our clock radios come equipped with a unique
MP3 Line-In Jack so your well-rested visitor can plug
any MP3 player into our radios and enjoy digital sound —
without headphones.

Taking time to make a difference.
